

ATTENTION MPO STAFF

We need your help!

The University of South Florida's (USF) Center for Urban Transportation Research (CUTR) is conducting a survey on MPO organizational structures and staffing levels. The results of this study will allow MPOs to compare themselves to their peers or guide senior leadership during periods of organizational change. The survey focuses on issues like employee turnover, staff specialization, consultant balance, hosting arrangements, and board structure. The participation of every MPO is crucial to assembling the most accurate set of information. To help add to the body of knowledge on MPOs, please take the survey at:
